

SURENDRAN I

Full Stack Developer | PHP / Laravel | React.js | Node.js
Tamil Nadu, India • isurendran777@gmail.com • +91 93611 49796 • [linkedin.com/in/surendran-i](https://www.linkedin.com/in/surendran-i)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience architecting and delivering scalable web and mobile applications that drive measurable business outcomes. Proven expertise across the complete development lifecycle — from REST API design and database optimization to responsive front-end engineering — using PHP (Laravel, CakePHP), React.js, Angular, Node.js, and Ionic Framework. Demonstrated track record of improving system performance by up to 60%, reducing manual errors by 60%, and accelerating order processing by 35% through clean architecture and workflow automation. Experienced Prompt Engineer leveraging AI tools (ChatGPT, GitHub Copilot, Gemini AI) to accelerate development velocity. Adept at Agile/Scrum environments with strong ownership, cross-functional collaboration, and a focus on writing maintainable, production-grade code.

CORE TECHNICAL SKILLS

Languages	PHP, JavaScript (ES6+), HTML5, CSS3, SQL, TypeScript (basic), C#, VB.NET
Frameworks & Libraries	Laravel, CakePHP, React.js, Angular, Node.js, Ionic Framework, jQuery, Bootstrap, Tailwind CSS
Backend & APIs	RESTful API Design & Integration, MVC Architecture, JWT Authentication, Payment Gateway APIs (Razorpay), Webhook Integration
Database	MySQL — query optimization, schema design, indexing, stored procedures
DevOps & Tools	Git, GitHub, Linux, Postman, Vite, CI/CD workflows, deployment automation (dev / staging / prod)
AI & Productivity	Prompt Engineering, ChatGPT, GitHub Copilot, Gemini AI
Methodologies	Agile / Scrum, Code Reviews, Performance Optimization, Responsive Design, Clean Code Principles

PROFESSIONAL EXPERIENCE

Frontend Developer & Prompt Engineer

Aug 2025 – Present

Warely Technology Private Limited • Tamil Nadu, India

- Architect and deliver modern, high-performance frontend applications using React.js, Tailwind CSS, JavaScript (ES6+), HTML5, and CSS3, improving UI responsiveness and UX quality across multiple products.
- Design and maintain a reusable component library that reduced new feature development time by an estimated 25%, accelerating sprint velocity.
- Lead Prompt Engineering initiatives — creating, testing, and optimizing AI prompts (ChatGPT, GitHub Copilot, Gemini AI) for software development automation and internal business workflows.
- Own end-to-end deployment pipelines across development, staging, and production environments; coordinate release management and environment configuration to ensure zero-downtime deployments.
- Support DevOps activities including build management, release coordination, and deployment automation using Git branching strategies (GitFlow).
- Collaborate with backend teams and stakeholders to define API contracts, review code, and drive continuous improvement of software delivery processes.

Full Stack Developer

Sep 2021 – Sep 2025

Featec Business Solutions • Tamil Nadu, India

- Designed and delivered 8+ enterprise-grade web and mobile applications (CRM, HRM, Inventory, Order Management, Vehicle Service, POS, Ride Booking) using Laravel, CakePHP, React.js, Angular, and Ionic Framework, serving clients across multiple industries.
- Engineered and integrated 15+ RESTful APIs enabling seamless frontend-backend communication; implemented secure JWT-based authentication and third-party service integrations (Razorpay, Ecom, Porter).

- ▶ Optimized SQL queries, indexing strategies, and application architecture, improving overall system performance by up to 40% and reducing page load times across production applications.
- ▶ Built reusable, accessible UI component libraries and responsive designs for both web and mobile (Ionic), ensuring consistent cross-platform user experiences.
- ▶ Automated manual business workflows across order processing, billing, and service management systems, contributing to efficiency gains of 25–60% across client operations.
- ▶ Collaborated in Agile/Scrum teams with product owners, QA engineers, and designers — participating in sprint planning, daily standups, and retrospectives to consistently deliver on-time releases.
- ▶ Mentored team members on Laravel best practices, Git workflow standards, and API design principles, contributing to elevated code quality across the team.

KEY PROJECTS

POS QR Ordering & Kitchen Display System

Tech Stack: *React.js, Laravel, MySQL, Bootstrap*

- ▶ Problem: Restaurant staff manually relayed customer orders, causing 60%+ error rate and kitchen delays.
- ▶ Solution: Engineered a QR-based digital ordering platform integrated with a POS system and real-time Kitchen Display System (KDS), enabling customers to order directly from their table.
- ▶ Outcome: Reduced manual order errors by 60%, improved kitchen throughput, and enhanced customer satisfaction scores.

VVD – Order Sales Management System & Mobile Applications

Tech Stack: *CakePHP, Ionic (React & Angular), MySQL, Bootstrap*

- ▶ Problem: Field sales teams lacked real-time tools for order capture, expense tracking, and analytics, causing processing delays.
- ▶ Solution: Built an end-to-end order management platform supporting bulk order uploads and two purpose-built mobile apps — SFA App (Ionic React) for field sales with leave management, expense tracking, travel tracking, and order analytics; VVD Connect (Ionic Angular) for retailer coupon and scheme management.
- ▶ Outcome: Improved order processing speed by 35%, increased field team productivity, and reduced manual data entry.

TVSFIT – Vehicle Service & Sales Management Platform

Tech Stack: *CakePHP, HTML5, CSS3, Bootstrap, jQuery, Razorpay API*

- ▶ Problem: Vehicle service centres managed GRN, billing, and payments manually, resulting in billing inaccuracies and slow transaction processing.
- ▶ Solution: Developed a full-featured vehicle service lifecycle management platform with GRN, Credit Note modules, and integrated Razorpay payment gateway for secure online transactions.
- ▶ Outcome: Automated workflows improving service efficiency by 30% and eliminating billing discrepancies.

Simpliapps – CRM, HRM & Inventory Management System

Tech Stack: *Angular, Laravel, MySQL*

- ▶ Problem: A growing business managed HR, customer relations, and inventory across disconnected spreadsheets and manual processes.
- ▶ Solution: Architected and delivered a unified CRM + HRM + Inventory platform with payroll automation, employee leave tracking, and real-time inventory management.
- ▶ Outcome: Improved inventory accuracy by 25%, eliminated manual data reconciliation, and centralized all business operations on a single platform.

Tompang – Ride Booking Application

Tech Stack: *React.js (Vite), Tailwind CSS, Laravel, REST APIs*

- ▶ Problem: Drivers and customers needed a simple, reliable platform to connect for ride bookings with real-time tracking.
- ▶ Solution: Built a responsive ride booking platform with driver-customer matching, booking history, and ride tracking features using React (Vite) for optimized frontend performance.
- ▶ Outcome: Delivered a mobile-first UI with high usability scores; Vite build optimizations reduced initial load time significantly.

Azelerator – Vehicle Enquiry & Spare Parts Sales Platform

Tech Stack: *CakePHP, Ionic (React & Angular), Ecom & Porter APIs*

- ▶ Problem: Fragmented enquiry, sales, and delivery tracking systems created operational inefficiencies for vehicle dealerships.
- ▶ Solution: Built a finance login system for vehicle enquiries, an AZEAPP mobile platform for buyer/seller operations, and an AZE Sales App for field team activity tracking; integrated Ecom and Porter delivery APIs.
- ▶ Outcome: Improved order tracking efficiency by 30% and streamlined multi-channel sales operations.

EDUCATION

B.Sc. Computer Science

2018 – 2021

Nadar Mahajana Sangam S. Vellaichamy Nadar College • CGPA: 9.14 / 10

ADDITIONAL INFORMATION

- ▶ Strong problem-solving, debugging, and performance profiling skills across frontend and backend layers.
- ▶ Experience with responsive design, WCAG accessibility standards, and cross-browser compatibility.
- ▶ Familiar with Docker basics, cloud deployment concepts (AWS/GCP), and environment-based CI/CD configurations.
- ▶ Active learner — currently upskilling in TypeScript, Redis caching, and microservices architecture.
- ▶ Effective communicator with experience presenting technical solutions to non-technical stakeholders in Agile environments.
